2. Foreword

The year 2022 was characterized by milder variants of the coronavirus and the invasion of Russia into Ukraine. The war led to supply shortages, particularly in energy, causing prices to skyrocket. As many sectors depend on oil and gas, prices in those sectors also increased significantly. This resulted in steep inflation that hasn't been experienced in over 40 years. Although there was no recession according to the economic definition, many people felt it in their wallets due to price inflation. The biggest changes for participants and the pension fund, however, come not from the global stage but from social partners.

NN Investment Partners (NN IP) is no longer part of the NN group, as it has been sold to Goldman Sachs Asset Management. This means that since early April 2022, the pension fund is associated with not one but two employers. Subsequently, as of October 1, 2022, the future pension accrual for NN employees has been transferred to BeFrank. NN IP has decided to extend the accrual for its employees until May 2023. This means that the pension fund will become premium-free from May 2023. The premium exemption for NN employees will be completed in the first quarter of 2023. All employees will be personally informed about this, and the same will happen for NN IP employees at a later stage.

In an attempt to curb the specter of inflation, central banks raised interest rates significantly last year. This occurred in the United States, European Union, United Kingdom, and Japan. During this economically uncertain time, the stock markets suffered substantial declines. All the mentioned developments had a major impact on the financial position of the pension fund and,

therefore, on all participants. Inflation and rising interest rates led to a lower valuation of stocks and bonds, causing a decrease in the pension fund's assets. The rising interest rates had the greatest effect. The funding ratio depends on interest rates, and its level greatly affects both pension accrual and indexation. With rising interest rates, pension liabilities decrease more than the value of investments (depending on interest rate hedging). This increases the funding ratio and provides the pension fund with more financial leeway. This means that for 2023, the full fiscally maximum accrual can be provided to NN IP participants, along with a partial indexation for 2022. The board has granted the maximum indexation allowed under the current rules. This represents a significant improvement compared to last year.

The outsourcing partners remain unchanged. Regarding the investment portfolio, the board has decided to further limit investment risks due to the premium exemption.

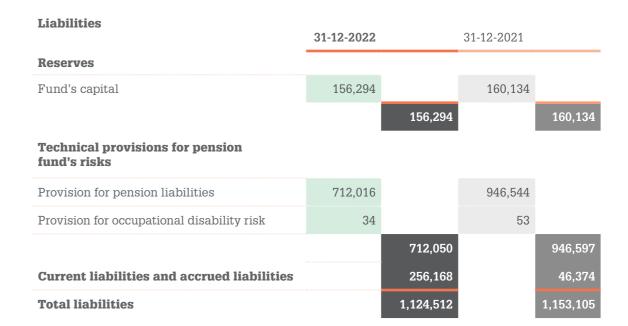

3. Balance sheet

All amounts are rounded to thousands of euros, unless otherwise stated.

Balance

(after appropriation of results)

| Assets | 31-12-2022 | | 31-12-2021 | |
|------------------------------------|------------|-----------|------------|-----------|
| Investments at pension fund's risk | | | | |
| Real estate investments | 121,338 | | 120,943 | |
| Equities | 251,392 | | 353,196 | |
| Fixed income investments | 465,364 | | 629,066 | |
| Derivatives | 243,752 | | 36,685 | |
| | | 1,081,846 | | 1,139,890 |
| Receivables and prepayments | | 1,035 | | 980 |
| Cash and cash equivalents | | 41,631 | | 12,235 |
| Total assets | | 1,124,512 | | 1,153,105 |

4. Cash flow statement

| Pension activities | 2022 | | | 2021 | |
